Low Profile Conveyors

QC Industries LLC

Heavy Duty Drive Packages

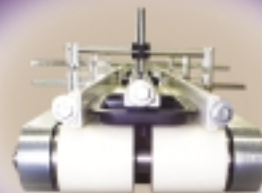

- ~ Available in Standard, Corrosion Resistant, Washdown and Magnetic Styles.
- ~ Quick belt change without removal of drive packages or guide rails.
- ~ Tight belt-to-frame width ratio. (Belt width 0.72" less than frame width.)
- ~ Superior Pinch Point Protection.
- ~ Available in metric version (SAE models are standard).
- ~ High speeds up to 2000 FPM.
- ~ Drive packages offer heavy-duty timing belt and pulley arrangements which provide a wide range of belt speeds and quiet operation.
- ~ Drive bearings are self-aligning and equipped with seals and grease fittings for lubrication while conveyor is running.
- ~ Optional self-tracking V-guide thermally welded to the carcass of the belt.
- ~ Ability to run multiple bands of belting on one conveyor.
- ~ Frame sections are 10 gauge, formed, powder coated steel. (Optional stainless steel or custom powder coating to match customer color specifications.)
- ~ Wide variety of belting available. (Cleated, Static Conductive, FDA/USDA, High Temperature, Cut Resistant, Chemical Resistant, High Friction and Low Friction.)
- ~ Standard and custom side rails, guide rails, stands, mounts, gear motors and accessories are available.

End Drive Conveyor
