

FLEXTRAC

PLASTIC CHAIN BELT CONVEYORS

NEW!

Longer. Faster. Stronger.

Flextrac Conveyors are available in lengths up to 30' and widths from 4" to 24". They offer high speeds - up to 375 fpm - and heavy load carrying capacities - up to 500 lbs. These conveyors offer a very low profile - a maximum 3.03" at the drive end, with the remainder of the conveyor only 2.41" high.

These sleek, quiet conveyors feature industry-standard 1" pitch belts for maximum compatibility with existing plastic chain applications. We offer 44 standard belt options to meet the demands of your application. Many of our popular 125 Series sides, guides, accessories and drive packages are compatible with Flextrac Conveyors. And, just like our 125 Series conveyors, our Lube-for-Life Bearings provide maintenance-free operation.

Please contact your local representative or distributor or our sales department today at (513) 753-6000 for more information about our Flextrac conveyors.

Belt Selections

Flush Grid Belts

MATERIAL: Polypropylene
General purpose belt; low coefficient of friction for accumulation applications; economical

FDA

MATERIAL: Proprietary High Temperature Composite
Composite material designed for part temperatures up to 392°F

MATERIAL: Polyethylene
Ideal for cold applications or those requiring superior chemical resistance

FDA

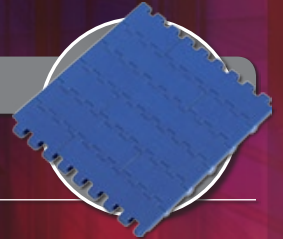

MATERIAL: Antimicrobial Polyethylene
Cold application belt with antimicrobial additive

FDA

Flat Top Belts

MATERIAL: Antimicrobial Polyethylene
Cold application belt with antimicrobial additive; open hinge design for easy cleaning

FDA

MATERIAL: Acetal + ESD
Durable belt with static dissipative properties for electronic assembly and packaging applications

MATERIAL: Polypropylene
General purpose belt; open hinge design for easy cleaning

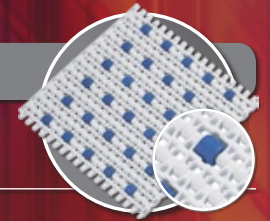

FDA

Specialty Belts

STYLE: Flush Grid with Rollers
Ideal for accumulating applications

MATERIAL: Polypropylene

FDA

STYLE: Nub Top
Nubbed top for easy product release; open hinge design for easy cleaning

MATERIAL: Polypropylene

FDA

STYLE: Vent Top
Ideal for moving small product; open hinge design for easy cleaning

MATERIAL: Polypropylene

FDA

STYLE: Flat Top with Grip
High friction belt for positive part movement

MATERIAL: Polypropylene (with TPE grips)

Belts with Flights & Sideguards

STYLE: Flat Top with Flights & Sideguards
Ideal for incline applications; side guards keep product contained

MATERIAL: Polypropylene

FDA

STYLE: Flat Top with Flights
Durable belt with flights for incline applications

MATERIAL: Acetal

FDA

This is only a representative sample of the more than 100 belts available.
